BackTracKit - Pairing Fret Zealot
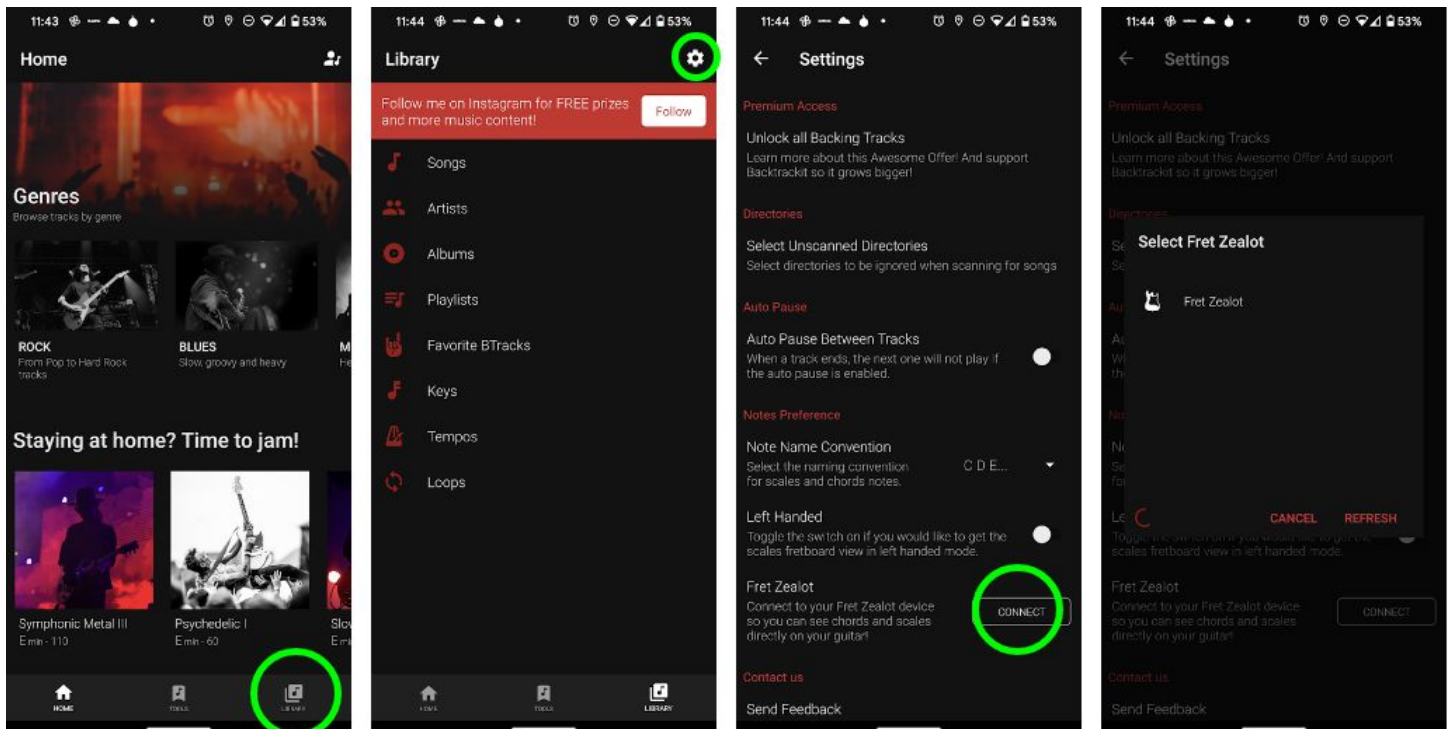

BackTracKit is a Musicians' Audio Player for [iOS](#) and [Android](#) devices. It is compatible with Fret Zealot for displaying individual chords, chord progressions, and scale patterns as part of backing tracks. It is meant as a practice app for musicians to try out new rhythms and sounds, and is loaded with features!

In the BackTracKit app, navigate to the 'Library' tab. From there, select the settings icon in the top right corner.

At the settings screen, you will see a Fret Zealot entry, with a 'Connect' cell showing the current status of the Fret Zealot connection. Turn on your Fret Zealot, and press connect. This screen will then show you the available Fret Zealot devices, and will prompt you when the device is 'connected'
